

DIY Playdough

Ingredients:

- 1/2 c. salt
- 2 c. water
- 2 T. oil or baby oil
- 1 T. alum or cream of tartar (*optional*)
- 1-2 Kool-aid pack(s) *more Kool-aid = more vibrant color*
- 2 c. flour

Directions:

Heat in the microwave for about a minute and a half or so until hot, just in case anyone decides to eat the playdough. Stir every 15 seconds or so to keep it from burning.

Boil the salt, oil, and water in a saucepan until the salt dissolves.

Mix the Kool-aid, flour, and alum together.

Remove from heat and add the Kool-aid mixture and stir until it forms a ball.

Knead until smooth and play away.

Store in an airtight container and refrigerate when not in use.
